

Italian Society of Periodontology
and Implantology

“Claudio Cevenini” Award 2025 for the best clinical case of non-surgical periodontal therapy

RESERVED TO DENTAL HYGIENISTS

The **Italian Society of Periodontology and Implantology** has established an annual Award since 2021, reserved for its **Dental Hygienist Members**, to honor the memory of the active member **Claudio Cevenini**, prematurely died, who has always supported the primary role of the Dental Hygienist for periodontal and oral health. within a professional team based activity. The goal of this Award is to even more involve our Dental Hygienists Members in the various activities of SIDP, through the presentation of a clinical case, in a **dedicated space (Clinical Forum) within the 2025 Annual Congress** of the Society (Rimini I, 13-15 March).

The **clinical case** should concern the treatment with non-surgical therapy of a case of periodontal disease. The **abstract**, written in Italian or English, must contain a brief description of the clinical case that includes, in addition to the diagnosis defined by the dentist with whom the hygienist collaborates, also the objectives of the treatment, the description of the timing, the strategies used to correct lifestyles and the evaluation of the results obtained in the medium to long term. The abstracts must be sent by **February the 17th 2025** using only the appropriate **electronic form** available on the website www.sidp.it (Competitions and Awards section) from September the 1st 2024.

The works deemed more deserving and accepted (up to a maximum of ten) will be presented and discussed by the participant in front of the Evaluating Committee and Colleagues, with a presentation lasting a total of fifteen minutes, including discussion. The presentations will be judged on the basis of the *iconographic quality of the documentation, organization of presentation and ability to answer the questions posed to the candidate.*

The other works received for participation in the awarding of the Prize may be presented as *Poster* again as part of the Society 2025 National Congress.

The explanatory iconographic material of the clinical case must be organized - in Italian or English - in **presentation format (PPT or Keynote)** following the indications given below.

The **presentation file** must be **sent to the Society Secretariat** using automatic file sharing and transfer systems via web such as:

- DROPBOX: <https://www.dropbox.com/>

- WE TRANSFER: <https://www.wetransfer.com/>;

the email address to which the material is to be sent is the following: segreteria@sidp.it.

The SIDP Secretariat will send it to the Coordinators of the 2025 session of the Clinical Forum-Claudio Cevenini Award, for the evaluation of acceptance.

Notification of acceptance or not will be sent by e-mail by **February the 28th 2025**.

Italian Society of Periodontology
and Implantology

The Evaluating Committee will have the task of evaluating the most deserving presentation to receive the Award, consisting of free registration in the SIDP for one year and publication of the clinical case at the Society's website www.sidp.it.

The **announcement of the winner** will officially take place during the final day of the SIDP Annual Congress 2025.

Suggestions and tips for selecting photographic documentation

The explanatory iconographic material of the clinical case must be organized in presentation format (PPT or Keynote) following the suggestions below but in any case it cannot exceed 16 slides overall.

Patient Needs Description (1 slide)

Initial clinical and radiographic situation at To (maximum 6-8 slides)

1. Initial clinical images of the various sextants to be treated with buccal and lingual views.
2. Complete periodontal probing (initial periodontal clinical chart).
3. Intraoral radiographic status.
4. Periodontal diagnosis (provided by the dentist).
5. Definition of the objectives to be achieved with therapy steps 1 and 2.

Non-surgical therapy (maximum 3 slides)

1. Description of the methods and operational times (protocol used).
2. A significant image of therapy step 1.
3. A significant image of therapy step 2.

Treatment outcome - Re-evaluation at 8-12 weeks (maximum 7 slides)

1. Clinical images (post steps 1-2) by sextant
2. Comparison of pre/post images of steps 1-2
3. Complete periodontal probing (re-evaluation periodontal chart).
4. Definition of the risk profile and the agreed frequency of maintenance therapy.

Follow-up at least 6 months (maximum 7 slides)

1. Clinical images by sextant at 6 months.
2. Complete periodontal probing.
3. Intraoral radiographic status (if at least 2 years of follow-up have passed).
4. Redefinition of the risk profile and the agreed frequency of maintenance therapy (if at least 1 year of follow-up has passed).

The maximum number of slides allowed is 16. No more than 6 clinical images can be used for each slide.
